PROJECTS

● PORTFOLIO WEBSITE

The website give the brief information about my self

● WATER POLLUTION MANAGEMENT

Water pollution is the contamination of water bodies, usually as a result of human activities, so to control the contamination of water we have made this , so that we can check the acidity of water , so that it can be purified time to time. The technologies used is Ph sensor , boat Arduino for programming and buzzer for the Alerting purpose.

● SMART GLASSES FOR MULTIMETER

I developed an innovative application of smart glasses technology to enhance the functionality of multimeters. By integrating smart glasses with multimeter capabilities, I enabled hands-free monitoring and data visualization, streamlining the troubleshooting and measurement process. This solution not only increased efficiency and accuracy but also improved safety by allowing technicians to work with both hands free while accessing real-time readings and diagnostics.
